

AI Query Response System

Overview

An AI-powered query response system built using Google Forms, Google Sheets, Make.com, and Google Gemini API.

The system accepts user questions through a Google Form, processes them using Gemini AI, and automatically stores the generated responses in a dedicated Google Sheet.

Workflow

Google Form → Google Sheets → Make.com Automation → Gemini API → AI Response Sheet

Features

- Automated query processing
- AI-generated responses
- Dynamic response generation using Gemini
- Google Workspace integration
- No-code workflow automation using Make.com

Technologies Used

- Google Forms
- Google Sheets
- Make.com
- Gemini API
- HTTP Requests
- JSON

Learning Outcomes

- API Integration
- Workflow Automation
- HTTP Requests
- JSON Payload Design
- AI Prompt Engineering
- Google Workspace Automation
